AD/BEA 121/29 Aircraft Fatigue Life 9/95

Applicability: B121 Pup, all models.

Requirement: Retire the airframe from service before exceeding 17900 fatigue hours. Fatigue hours shall be calculated in accordance with Jetstream Alert Service Bulletin B121/101.

Note: CAA(UK) AD 014-03-95 refers.

Compliance: Effective 17 August 1995.

Background: The Beagle Pup has been allocated a mandatory fatigue life by the United Kingdom Civil Aviation Authority.
