AD/BAe 146/12 Elevator `G' Weight Damper 6/89 Amdt 1

Applicability: All models with S/Nos referenced in the Requirement document.

Requirement: Action in accordance with BAe SB 27-77-00955 A & C Rev 2.

Compliance: Prior to 30 September 1989.

Background: This AD contains two concurrent modifications. One to overcome control column oscillation at 2.5 Hz and the other to increase stick centring force following an autopilot cutout. Amendment 1 requires additional work, includes other series aircraft and includes variations dependent on modification state.
