

Boeing 727 Series Aeroplanes

AD/B727/84
Amdt 3

Main Landing Gear Lock System

9/88

Applicability: All models to line number 1125.

Requirement: Action in accordance with Boeing S.B. 727-32-0237 Rev 4.

Note: FAA AD 79-04-01 R3 is referenced for earlier issues of this Directive.

Compliance: Prior to 31 December 1988.

Background: Aircraft were initially modified to provide higher strength components in the MLG lock system. Since that time there have been reports of missing nuts and the loss of a bolt.
