

Boeing 747 Series Aeroplanes

**AD/B747/154
Amdt 1**

**Nacelle Strut and Wing Structure - Rolls
Royce RB211 Series Engine**

2/96

Applicability: Model 747 series aircraft with line positions 292 through 1033, equipped with Rolls Royce RB211 series engine.

Requirement: Action in accordance with the technical requirements of FAA AD 95-13-05 Amdt 39-9285.

Note: Boeing Alert Service Bulletin 747-54A2157 Revision 1 refers.

Compliance: As specified in the Requirement Document.

The Compliance of the initial issue of this Directive remains unchanged. This Amendment is effective from 1 February 1996.

Background: The FAA requires the incorporation of a modification of the strut and wing structure that has been developed by the manufacturer to improve the damage tolerance capability and durability of the strut-to-wing attachments, and reduce reliance on inspections of those attachments. Amendment 1 is issued to introduce a revision of the manufacturer's service bulletin which is related to this Directive.
