

Boeing 767 Series Aeroplanes

AD/B767/3

**Pneumatic Air Supply PRSOV Actuator
Linkage - Inspection and Modification**

**7/85
TX**

- Applicability: All models equipped with Pressure Regulating and shut off Valves Part Nos. 773288-4 and 773288-5.
- Requirement: Boeing Alert Service Bulletin 767-36A0015.
- Compliance: As detailed in the requirement document.
- Background: The manufacturer has reported an incident where a failure of the PRSOV caused the pneumatic ducting to be subjected to high pressure air. Considerable damage resulted and jamming of the flap and breakage of the throttle control occurred.
