

Boeing 767 Series Aeroplanes

---

**AD/B767/26**

**Fuel Valve Actuator**

**6/97**

CANCELLED.

Background: This AD was completed on all Australian registered Boeing 767 aircraft before the end of 1990. All aircraft brought onto the register after this time would have had to comply with the FAA AD 89-14-06 Amendment 39-6252. There is therefore no justification for keeping this AD active any longer.
