

Boeing 767 Series Aeroplanes

AD/B767/37

Brake Metering Valve Module Shaft

7/90

Applicability: Model 767 series aeroplanes with line positions 1-131, 133-135, 137-147, 149, 155-157, and 159-161.

Requirement: Unless already accomplished replace aluminium brake metering valve module with steel shafts in accordance with Boeing Service Bulletin 767-32-0081.

Note: FAA AD 89-26-01 Amdt 39-6416 refers.

Compliance: Within 750 landings after 12 July 1990 or prior to the accumulation of 15,000 landings, whichever occurs later.

Background: Fractures of brace metering valve module aluminium shafts have occurred on model 757 series aeroplanes. The model 767 has similar shafts, and incorporation of steel shafts will prevent a potential loss of braking.
