

Gulfstream (Grumman American/ American Aviation) AA-1 Series Aeroplanes

AD/AA-1/1A

Control Cables and Pulleys - Inspection

NK

Applicability: All models.

Requirement: Thoroughly clean and inspect all rudder, aileron and elevator control pulleys and cables where the cables pass under the pulley grouping forward of the wing centre spar.

Note: To adequately inspect the cable it will be necessary to actuate the controls to the full deflection to expose the complete cable pulley contact area for examination.

Compliance: Within 100 hours time in service after 25 February 1972 and thereafter at intervals not exceeding 100 hours time in service.
