

Airtractor AT-300, 400 and 500 Series Aeroplanes

---

**AD/AT/12**

**Hopper Dump Handle**

**11/91**

CANCELLED.

Background: This requirement was made mandatory following discussions with Australian agent who urged AD action.

The agent now wishes the mandatory status removed and requested a cockpit assessment by a CAA Test Pilot to determine whether modification of the hopper dump handle is a necessary safety action. The Test Pilot concluded that modification of the hopper dump handle is not necessary.
