

Cessna 206 Series Aeroplanes

AD/CESSNA 206/38

**Retirement Lives - Fatigue
Critical Components**

6/85

- Applicability: All model U206G and TU206G which have been modified in accordance with US FAA STC SA2353NM (Soloy Turbine Conversion).
- Requirement: Action in accordance with Soloy Turbine Pac Maintenance and Overhaul Manual, Revision No. 2 dated 1 August 1984.
- Compliance: All life limited components listed in Table I-8 of the Requirement document shall be retired from service before exceeding the lives quoted.
- Background: The components listed have been assessed as critical to flight safety. Operation beyond their published retirement lives may increase the risk of failure.
