**AIRWORTHINESS DIRECTIVE**

For the reasons set out in the background section, the CASA delegate whose signature appears below issues the following Airworthiness Directive (AD) under subregulation 39.001(1) of CASR 1998. The AD requires that the action set out in the requirement section (being action that the delegate considers necessary to correct the unsafe condition) be taken in relation to the aircraft or aeronautical product mentioned in the applicability section: (a) in the circumstances mentioned in the requirement section; and (b) in accordance with the instructions set out in the requirement section; and (c) at the time mentioned in the compliance section.

**AlliedSignal (Garrett/AiResearch) Turbine Engines - TFE731 Series**

**AD/TFE 731/35**  
**High Pressure Turbine Rotor Discs Curvic Couplings**

<tr>
<td></td>
<td>3. HP turbine rotor discs removed per Requirements 1 or 2 of this AD must pass a curvic root radius inspection performed by Honeywell Engines, Systems and Services, Phoenix, Arizona, Certificate Repair Station No. ZN3R030M before the discs are eligible for reinstallation in an engine.</td>
</tr>
</tbody>
</table>

For the purposes of this AD, access to the HP turbine rotor discs is defined as the removal of the HP turbine rotor assembly from the engine.

**Note 2**: FAA AD 2008-02-19 Amdt 15349 dated 16 January 2008 refers.
AlliedSignal (Garrett/AiResearch) Turbine Engines - TFE731 Series

AD/TFE 731/35 (continued)

Compliance: 1. For TFE731-2C, -3B, -3BR, -3C, -3CR, -3D, -3DR, -4R, -5AR, -5BR, and -5R series turbofan engines use the following drawdown schedule:
   a. For HP turbine discs with 4,200 cycles-since-new (CSN) or more on the effective date of this AD, remove HP turbine rotor assemblies within 100 cycles-in-service (CIS) after the effective date of this AD.
   b. For HP turbine discs with fewer than 4,200 CSN on the effective date of this AD, remove HP turbine rotor assemblies at the next access to the HP turbine rotor discs, but not to exceed 4,300 CSN.

2. For TFE731-20R, -20AR, -20BR, -40, -40AR, -40R, and -60 series turbofan engines use the following drawdown schedule:
   a. For HP turbine discs with 3,200 CSN or more on the effective date of this AD, remove HP turbine rotor assemblies within 100 CIS after the effective date of this AD.
   b. For HP turbine discs with fewer than 3,200 CSN on the effective date of this AD, remove HP turbine rotor assemblies at the next access to the turbine rotor discs, but not to exceed 3,300 CSN.

3. From the effective date of this AD.

This Airworthiness Directive becomes effective on 8 May 2008.

Background: This AD results from the manufacturer's report that some HP turbine rotor discs received improperly machined radii in the root of the forward and aft curvic teeth during manufacture. The issuing of this AD is intended to prevent uncontained failure of the HP turbine rotor assembly, which could result in damage to the aeroplane.

David Punshon
Delegate of the Civil Aviation Safety Authority
