

Aircraft - General

---

**AD/GENERAL/6  
Amdt 1**

**Aircraft Alternate Static Systems**

**6/97**

CANCELLED.

Background: This AD was originally raised in May 1969 in response to a possible cause of an aircraft accident. However, no evidence has been found to date to substantiate this action. It should be noted that this is an Australian unique AD and the lack of action from international agencies would tend to indicate that this is not an issue.
