

Aircraft - General

AIRWORTHINESS DIRECTIVE

For the reasons set out in the background section, the CASA delegate whose signature appears below revokes Airworthiness Directive AD/GENERAL/77.

AD/GENERAL/77

Suspect Fuel

2/2000 TX

Requirement: CANCELLED.

Background: This Directive has been cancelled effective 10 January 2000. The Directive has been cancelled in response to substantial evidence of fuel system contamination re-occurring in aircraft that have complied with the requirements of this Directive. It is now known that the contaminant is Ethylene Di-Amine (EDA). EDA can exist as a clear substance as well as a black sticky substance as previously advised. To address concern for the airworthiness of aircraft refuelled with 100/130 AVGAS now known to have been contaminated with EDA, AD/GENERAL/78 has been issued, effective 10 January 2000.

David Alan Villiers
Delegate of the Civil Aviation Safety Authority

10 January 2000
