
AIRWORTHINESS DIRECTIVE

On the effective date specified below, and for the reasons set out in the background section, the CASA delegate whose signature appears below revokes Airworthiness Directive AD/RAD/17.

Radio Communication and Navigation Equipment

AD/RAD/17 AWA VC-10 VHF Transceiver - Modification 4/2009

Requirement: CANCELLED.

This AD is cancelled on 9 April 2009.

Background: This unique Australian AD was raised in 1967 against AWA Aviation Service Bulletin (SB) No. P18 requiring a modification to Skyphone VC-10 series VHF Transceivers to reduce second harmonic radiation from the transmitter to a level at least 40 dB below the mean carrier level to ensure the receiver radiations are not more than 50 milli-micro watts due spurious radiation from this equipment causing serious interference to other communication systems.

Compliance was before 1 August 1967.

Given the extended period this AD has been promulgated, and that affected VHF Transceivers would have been modified by now, this AD is considered to be no longer required.

James Coyne
Delegate of the Civil Aviation Safety Authority
