
AIRWORTHINESS DIRECTIVE

On the commencement date specified below, and for the reasons set out in the background section, this airworthiness directive (AD) is repealed by CASA ADCX 011/21.

Restraint Equipment

**AD/RES/10
Amdt 4**

Indiana Mills Safety Belts

25/2021

Requirement: CANCELLED.

This AD is cancelled on 10 December 2021.

Background: This AD required removal from service of safety harnesses and fittings that did not function as required. The latest Amendment of this AD (Amendment 4) was issued in 1994 to allow modification of lever action type buckles as an alternative to removal from service. As Australian operators would have either removed from service or modified affected parts long ago in accordance with the requirements of the AD, this AD is now obsolete. Other National Aviation Authorities such as the United States FAA, United Kingdom CAA and Transport Canada have also issued equivalent ADs addressing this issue and this would result in the world fleet being addressed.
