

Seats and Berths

AD/SEATS/4

**Historical and Ex-Military
Aircraft - Harness Attachment**

12/88

Applicability: All aircraft operated under an historical and ex- military Permit-To-Fly.

Requirement: 1. Inspect seat belt and harness attachments to ensure that they are connected to metal structure - either seat or airframe.

2. If the attachment is to non-metal structure, modify the harness attachments to a scheme acceptable to the Authority.

Compliance: Before each issue of Permit-To-Fly.

Background: During a forced landing of an ex-military aircraft, the seat belt separated from the crew seat which was manufactured from a type of phenol formaldehyde reinforced material.
