

Hot Air Balloons

**AD/BAL/5
Amdt 1**

Fuel Manifold System

6/86

- Applicability: All balloons in Aerial work and Charter operations which are not fitted with dual blast valves or burners.
- Requirement: LPG cylinders used for flight shall be connected to a manifold system approved by the Secretary.
- Compliance: Prior to issue of a certificate of airworthiness.
- Background: This Directive has been amended to delete those balloons fitted with dual blast valves or burners.
