

Airworthiness Directive

AD No.: 2022-0189

Issued: 19 September 2022

Note: This Airworthiness Directive (AD) is issued by EASA, acting in accordance with Regulation (EU) 2018/1139 on behalf of the European Union, its Member States and of the European third countries that participate in the activities of EASA under Article 129 of that Regulation.

This AD is issued in accordance with Regulation (EU) 748/2012, Part 21.A.3B. In accordance with Regulation (EU) 1321/2014 Annex I Part M.A.301, or Annex Vb Part ML.A.301, as applicable, the continuing airworthiness of an aircraft shall be ensured by accomplishing any applicable ADs. Consequently, no person may operate an aircraft to which an AD applies, except in accordance with the requirements of that AD, unless otherwise specified by the Agency [Regulation (EU) 1321/2014 Annex I Part M.A.303, or Annex Vb Part ML.A.303, as applicable] or agreed with the Authority of the State of Registry [Regulation (EU) 2018/1139, Article 71 exemption].

Design Approval Holder's Name:

AIRBUS S.A.S.

Type/Model designation(s):

A330 and A340 aeroplanes

Effective Date: 03 October 2022

TCDS Number(s): EASA.A.004, EASA.A.015

Foreign AD: Not applicable

Supersedure: This AD supersedes EASA AD 2016-0231 dated 22 November 2016.

ATA 57 – Wings – Inboard Flap Parts – Identification / Inspection

Manufacturer(s):

Airbus, formerly Airbus Industrie

Applicability:

Airbus A330-201, A330-202, A330-203, A330-223, A330-223F, A330-243, A330-243F, A330-301, A330-302, A330-303, A330-321, A330-322, A330-323, A330-341, A330-342, A330-343 and A330-743L aeroplanes, all manufacturer serial numbers (MSN); and

Airbus A340-211, A340-212, A340-213, A340-311, A340-312, A340-313, A340-541, A340-542, A340-642 and A340-643 aeroplanes, all MSN.

Definitions:

For the purpose of this AD, the following definitions apply:

Affected inboard flap: Inboard flaps listed by serial number (s/n) in Appendix 1 of this AD.

Groups: Group 1 aeroplanes are all affected aeroplanes, except A330-743L.

Group 2 aeroplanes are A330-743L aeroplanes.

The SB: Airbus Service Bulletin (SB) A330-57-3120 and SB A340-57-5036, as applicable.

Reason:

Following a quality control review on the final assembly line, it was discovered that non-conforming aluminium alloy had been used to manufacture several structural parts on the inboard flaps.

This condition, if not detected and corrected, could reduce the structural integrity of the aeroplane.

To address this potential unsafe condition, Airbus issued the SB to provide instructions to identify and inspect the potentially affected parts.

Consequently, EASA issued AD 2016-0082 to require identification of the potentially affected inboard flaps, a one-time special detailed inspection (SDI) to identify which material they are made of, and, depending on findings, replacement with serviceable parts.

After that AD was issued, it was confirmed that flaps, initially installed on A340-500 and A340-600 aeroplanes, may also have been installed in service on A340-200 and A340-300 aeroplanes. As this installation was not done during production, no SB was published for these models.

Consequently, EASA issued AD 2016-0231, retaining the requirements of AD 2016-0082, which was superseded, to expand the Applicability to include A340-200 and A340-300 aeroplanes, and to correct typographical errors. That AD also allowed, under certain conditions, installation of an affected inboard flap on an aeroplane.

Since that AD was issued, it has been determined that, even if no affected inboard flap has been installed on A330-743L aeroplanes during production, it could be installed as a spare part on those aeroplanes.

For the reason described above, this AD retains the requirement of EASA AD 2016-0231, which is superseded, and expands the Applicability to include A330-743L aeroplanes. Furthermore, this AD reduces the allowance to install an affected inboard flap, only provided it is confirmed it is made of conforming material.

Required Action(s) and Compliance Time(s):

Required as indicated, unless accomplished previously:

Identification:

- (1) For Group 1 aeroplanes: Within 24 months after 11 May 2016 [the effective date of EASA AD 2016-0082], inspect each left-hand (LH) and right-hand (RH) inboard flap to identify its s/n, to determine whether the inboard flap is an affected inboard flap (see Note 1 of this AD).
- (2) For Group 2 aeroplanes: Within 3 months after the effective date of this AD, inspect each LH and RH inboard flap to identify its s/n, to determine whether the inboard flap is an affected inboard flap (see Note 1 of this AD).

Note 1: A review of aeroplane delivery and/or maintenance records in lieu of inspecting the inboard flaps is an acceptable method to make the determination as required by paragraph (1) or (2) of this AD, as applicable, provided those records can be relied upon for that purpose and the s/n of the

affected inboard flap(s) can be positively identified from that review.

Note 2: For Airbus A330, A340-500, and A340-600 aeroplanes, the SB lists the s/n of potentially affected LH and RH inboard flaps and the corresponding aeroplane MSN on which these parts were installed during production. That MSN list is for information only, as it cannot be excluded that an affected inboard flap has been removed from an aeroplane and re-installed on another aeroplane.

Inspection:

- (3) For Group 1 aeroplanes: For each affected inboard flap, identified as required by paragraph (1) of this AD, within 6 years after 11 May 2016 [the effective date of EASA AD 2016-0082], or within 12 years after the date of first operation of the affected inboard flap, as defined in Appendix 1 of this AD, whichever occurs first, accomplish an SDI in accordance with the instructions of the SB, or contact Airbus for approved SDI instructions and, within the compliance time(s) specified in those instructions, accomplish the SDI accordingly.
- (4) For Group 2 aeroplanes: For each affected inboard flap, identified as required by paragraph (2) of this AD, within 3 months after the effective date of this AD, contact Airbus for approved SDI instructions and, within the compliance time(s) specified in those instructions, accomplish the SDI accordingly.

Corrective Action(s):

- (5) If, during the SDI as required by paragraph (3) or (4) of this AD, as applicable, a part manufactured from non-conforming material is detected, within 30 days after that SDI, contact Airbus for approved replacement instructions and, within the compliance time(s) specified in those instructions, accomplish the replacement accordingly.

Parts Installation:

- (6) For Group 1 and Group 2 aeroplanes: From the effective date of this AD, it is allowed to install on any aeroplane an affected inboard flap, provided it has been inspected as specified in paragraph (3) or (4) of this AD, as applicable, and that, following that inspection, it has been determined that it is manufactured from conforming material.

Ref. Publications:

Airbus SB A330-57-3120 original issue dated 18 September 2015.

Airbus SB A340-57-5036 original issue dated 18 September 2015.

The use of later approved revisions of the above-mentioned documents is acceptable for compliance with the requirements of this AD.

Remarks:

1. If requested and appropriately substantiated, EASA can approve Alternative Methods of Compliance for this AD.
2. This AD was posted on 20 July 2022 as PAD 22-096 for consultation until 17 August 2022. No comments were received during the consultation period.

3. Enquiries regarding this AD should be referred to the EASA Safety Information Section, Certification Directorate. E-mail: ADs@easa.europa.eu.
4. Information about any failures, malfunctions, defects or other occurrences, which may be similar to the unsafe condition addressed by this AD, and which may occur, or have occurred on a product, part or appliance not affected by this AD, can be reported to the [EU aviation safety reporting system](#). This may include reporting on the same or similar components, other than those covered by the design to which this AD applies, if the same unsafe condition can exist or may develop on an aircraft with those components installed. Such components may be installed under an FAA Parts Manufacturer Approval (PMA), Supplemental Type Certificate (STC) or other modification.
5. For any question concerning the technical content of the requirements in this AD, please contact: AIRBUS S.A.S. – 1IAL (Airworthiness Office),
E-mail: airworthiness.A330-A340@airbus.com.
