

# AIRWORTHINESS DIRECTIVE

*This Airworthiness Directive (AD) is issued pursuant to Canadian Aviation Regulation (CAR) 521.427. No person shall conduct a take-off or permit a take-off to be conducted in an aircraft that is in their legal custody and control, unless the requirements of CAR 605.84 pertaining to ADs are met. Standard 625 - Aircraft Equipment and Maintenance Standards Appendix H provides information concerning alternative means of compliance (AMOC) with ADs.*

**Compliance:**

Within 12 months from the effective date of this AD, unless already accomplished.

**Background:**

Bombardier Inc. determined that some aeroplanes were delivered without a portable PBE device located in the left-hand side (LHS) forward wardrobe or cockpit or passenger cabin area of the aeroplane. The PBE is required to meet the certification standards and provides protection for crew members when investigating or combatting a fire in the cabin.

This AD mandates an inspection to determine if portable PBE is installed and, if not installed, requires portable PBE to be installed along with the associated placard.

**Corrective Actions:**

Verify if portable PBE, marked with Technical Standard Order (TSO) C116 or TSO C116a, is installed in the LHS forward wardrobe or cockpit or passenger cabin area of the aeroplane.

- A. If no portable PBE marked with TSO C116 or TSO C116a is found installed, install the portable PBE marked with TSO C116 or TSO C116a and the associated placard, in accordance with Section 2.B. of the Accomplishment Instructions of Bombardier Service Bulletin (SB) 604-35-008, Revision 2, dated 13 January 2023, or later revisions approved by the Chief, Continuing Airworthiness, Transport Canada.
- B. If portable PBE marked with TSO C116 or TSO C116a is found installed, no further action is required.
