

British Aerospace BAe 3100 (Jetstream) Series Aeroplanes

AD/JETSTREAM/2

**Propeller Ice and Rain
Protection - Modification**

1/85

Applicability: Jetstream Series 3100 aircraft. Constructors numbers 601 to 645.

Requirement: Service Bulletin 30-JM7453 Revision 1.

Compliance: Before further flight after 31 May 1985.

Background: The manufacturer has introduced a revised propeller de-icing system to resolve the problems of induced vibrations occurring during icing encounters at low ambient temperatures.
