

British Aerospace BAe 3100 (Jetstream) Series Aeroplanes

AD/JETSTREAM/33 Inhibition of TTL Test and Stall Protection 6/89
Test Functions During Flight

Applicability: As listed in Requirement Document.

Requirement: Action in accordance with British Aerospace SB 24-JM7657A.

Compliance: Prior to 31 August 1989.

Background: This AD is raised to ensure that inadvertent selection of the TTL or stall protection test switches during flight will not result in an unsafe condition.
