

Hiller UH-12 Series Helicopters

AD/HILLER 12/37

**Soloy Conversion: Power Turbine
Governor Control System - Modification**

6/85

Applicability: All Soloy turbine conversion UH12D/E and E (4 Place) helicopters.

Requirement: Soloy Conversions S.B. 06-560.

Compliance: Prior to the issue of the next Maintenance Release after 30 June 1985.

Background: The design, applicable prior to the issue of the Requirement Document, could result in loss of collective pitch control. This modification includes a spring bungee unit that will allow the collective lever to operate independently, if the governor cable seizes.
