

Sikorsky S-76 Series Helicopters

---

**AD/S-76/33**

**Engine Containment Kit and  
Compartment Protection Shield**

**2/85  
TX**

CANCELLED.

Background: FAA AD 84-24-02 Amdt 39-4957 supersedes telegraphic AD T84-16-51 which was the Reference Document for this AD.

The containment protection shields, an interim solution pending development of engine containment rings, are now removed. Alternate configurations of airframe mounted plates and engine containment rings are detailed in FAA AD 84-24-02 Amdt 39-4957 referring to Sikorsky Alert S.B. 76-71-7 and Allison CEBs. A-72-3124, 3125 and 3128. ANO Part 106 AD/AL-250/64 details the requirement and compliance statements for all configurations of engine and engine compartment protection for C30 and C30S powered S76 series helicopters.
