

Pratt and Whitney Turbine Engines - JT8D Series

AD/JT8D/26 **Number 4 and 5 Bearing Compartment Oil Fires** **11/95**
Amdt 1

CANCELLED.

Background: This Directive is cancelled. A risk analysis study completed by the manufacturer on the requirement for the periodic inspection of the No. 4 and 5 bearing compartment scavenge oil temperature has resulted in relief against this requirement. Compliance with this requirement is now an operator option.
