
AIRWORTHINESS DIRECTIVE

On the effective date specified below, and for the reasons set out in the background section, this AD is revoked by CASA ADCX 016/10.

Pratt and Whitney Canada Turbine Engines - PT6T series

AD/PT6T/10	Compressor Bleed Off Valve	14/2010
-------------------	-----------------------------------	----------------

Requirement: CANCELLED.

This AD is cancelled on 12 July 2010.

Background: This AD was originally issued in response to Transport Canada AD CF-96-24.

Transport Canada determined on the basis that the conservative compliance time/date defined for the inspection has elapsed and the fact that there have been no further reported occurrences of the original Bleed Off Valve (BOV) malfunctions since April 1997, AD CF-96-24 was no longer required.

A review of SDR data also concluded that there have been no reported occurrences of the original BOV in Australia during the same period.

As a result, the unsafe condition no longer exists therefore this AD is no longer required.
