

Grumman G21 (Goose) Series Aeroplanes

---

**AD/G21/4**

**Rudder Control Push-Rod Assembly  
P/N 12727-1 - Inspection**

**10/77**

Applicability: All models.

- Requirement:
1. Remove rudder control push rod assembly P/N 12727-1.
  2. Thoroughly clean both rod end fittings.
  3. Inspect both fittings for cracks using a dye penetrant technique in conjunction with at least a 10X magnifying glass.

*Note 1. Push rod assembly P/N 12727-1 is connected to the LH rudder pedals and is located below the pilot's compartment floor approximately 240 mm to the right of the aircraft centre line.*

*Note 2. FAA AD 63-27-2 Amendment 655 refers.*

Compliance: Inspect initially before issue of Certificate of Airworthiness and thereafter at intervals not exceeding 100 hours time in service.
