

Aerospatiale Rallye Series Aeroplanes

---

**AD/MSR/26**                      **Wing Structural Fatigue Life Limitation**                      **3/80**

Applicability: All series 235E aircraft.

Requirement: Retire the wing main spar and the centre section splice plates from service.

*Note: This fatigue life limitation will be reviewed upon receipt of future substantiation data from the manufacturer.*

Compliance: Upon or prior to achieving 2800 hours component time in service.

Background: Based on information provided by the manufacturer, a safe fatigue life has been determined for the wing structure.
