

Victa and A.E.S.L. Airtourer Series Aeroplanes

AD/VAT/36 **Fuel Pump Heat Deflector - Modification** **11/70**

Applicability: Airtourer 100, 115 and 150.

Requirement: Install a deflector plate or similar device to ensure that the exhaust of hot air from the cabin heater distribution box assembly is deflected away from the electric fuel pump when the cabin heater is selected to the OFF position.

Note: An acceptable means of compliance is a deflector manufactured to Drawing No. LVAC III which can be obtained from the Latrobe Valley Aero Club, Victoria.

Compliance: Before 1 January 1971.
