

Eurocopter BO 105 Series Helicopters

AD/BO 105/6

Fuel Filter Drain Valve

**9/86
DM**

Applicability: All model BO 105 helicopters fitted with engine fuel filter drain valve P/No P101-228.

Requirement: Action in accordance with MBB Alert Service Bulletin ASB BO 105-60-101.

Note: German AD 86-148 MBB Refers.

Compliance: Corrective action 1 of Requirement Document:

Before further flight after 22 August 1986.

Corrective action 2 of Requirement Document:

At each daily inspection after 22 August 1986.

Corrective action 3 of Requirement Document:

This action may be carried out before further flight after 22 August 1986 in which case corrective actions 1 and 2 need not be complied with.

Note: Corrective action in accordance with action 3 is an interim measure until manufacturer can supply improved drain valves.

Background: Draining the fuel filters at preflight checks may loosen the handle of the shutoff plunger and under adverse conditions may cause the drain valve to disintegrate.
