

Cessna T303 Series Aeroplanes

**AD/CESSNA 303/2
Amdt 1**

Flight Into Icing Conditions

8/85 DM

- Applicability: Model T303 with Serial Numbers T30300001 to T30300315 fitted with wing leading edge de-ice boots and propeller de-icing.
- Requirement: 1.a. Fabricate and install adjacent to the anti-ice system switches the following placard:
- "FLIGHT INTO KNOWN ICING PROHIBITED"
- 1.b. Insert a copy of FAA AD No. 85-11-05 in the limitation section of the Pilot's Operating Handbook. Copies of this AD are available from Department of Aviation, Airworthiness Offices.
- 2.a. Install Rudder Balance Weight Modification Kit, Part No SK303-34 in accordance with Cessna Service Bulletin MEB 85-7.
- 2.b. Remove placard and copy of FAA AD specified in Part 1 of this AD.
- Compliance: 1. Before further flight after 31 August 1985 until modified in accordance with Requirement 2.
2. Before further flight after 30 November 1985.
- Background: Ice formation on the fin has been found to cause rudder flutter.
